

## ECOL Medical Outreach to Diah, Cape Mount

May 2023

Demonstrating the love of God in a tangible way:

910 villages received free medical and dental treatment during the medical outreach in Diah village.

Diah is a predominantly Muslim community (99% Muslim). One female adult accepted Christ Jesus as Lord and Savior as the result of the outreach. Since then, four more people have accepted Christ, and a church has started in the next village of Sowee Beach about two hours walk from Diah.

The medical outreach ministry of ECOL recruits Christian health volunteers and evangelists for medical missions in rural Liberia where there are no health facilities/functional health facilities, and uses the opportunity to share the gospel. We raise fund to purchase medical drugs for our medical missions to rural Liberia.

To date, ECOL has conducted 31 medical missions since the ministry was launched in mid-July 2018.
